Projects

❖ **FiberNook E-commerce Application** | [github](#) | [view](#)

Currently I'm working on this project where i'm trying to create fully separate frontend and backend and API with the best practices And implementing and learning everything it takes to be a full stack developer.

Technology used : HTML5, REACTJS, REACT-ROUTER-DOM, REDUX TOOLKIT, MATERIAL UI, TAILWINDCSS, SQLITE3, DJANGO, POSTMAN, DJANGO REST FRAMEWORK.

❖ **Blog Project** | [view](#) | [github](#)

Having strong knowledge about css is important to design a perfect webpage. This is a project i did with only raw css to prove my strong understanding of css.

Technology used : HTML5, BOOTSTRAP5, SQLITE3, DJANGO, DJANGO ORM, PYTHON PACKAGES.

❖ **Nike Store** | [view](#) | [github](#)

This a project where i'm trying to clone nike store. I am still working on this project where i will add react-router-dom and DarkMode and many features to come.

Technology Used : JSX, CSS, REACT JS, REACT-ROUTER-DOM.

❖ **News24 Portal** | [github](#) | [view](#)

A Single page web app created using react, react and tailwindcss with darkmode and built with vite. In future i'm planning to make fully separate backend in django and create fully function new portal.

Technology used : REACT JS, REACT ROUTER, TAILWIND CSS.
