Career Objective

I'm a passionate web developer, driven by self-motivation and a genuine enthusiasm for crafting innovative solutions. My focus revolves around mastering the art of JavaScript and Python, fueled by a deep-seated curiosity. I aspire to contribute my skills to the dynamic landscape of the Software industry, collaborating with both local and multinational agencies in Bangladesh. Eager to immerse myself in modern web technologies, I am poised to embark on a journey of growth, embracing increasing responsibilities along the way.

Skills and Tools

HTML, CSS, BOOTSTRAP, TAILWIND CSS, JAVASCRIPT, REACTJS, REDUX TOOLKIT, PYTHON, DJANGO, DJANGO REST FRAMEWORK, GIT AND GITHUB, POSTMAN, FILMORA X, FIGMA, HOSTINGER, PYTHON ANYWHERE

Projects

❖ **Blog Project** | [view](#) | [github](#)

Having strong knowledge about css is important to design a perfect webpage. This is a project i did with only raw css to prove my strong understanding of css.

Technology used : HTML5, BOOTSTRAP5, SQLITE3, DJANGO, ORM.

❖ **Nike Store** | [view](#) | [github](#)

This is a project where I'm trying to clone Nike Store. I am still working on this project where I will add react-router-dom and DarkMode and many features to come.

Technology Used : JSX, CSS, REACT JS, REACT-ROUTER-DOM.

❖ **E-commerce Application** | [github](#) | [view](#)

Currently I'm working on this project where I'm trying to create fully separate frontend and backend and API with the best practices And implementing and learning everything it takes to be a full stack developer.

Technology used : HTML5, REACTJS, REACT-ROUTER-DOM, MATERIAL UI, TAILWINDCSS, SQLITE3, DJANGO, POSTMAN, DJANGO REST FRAMEWORK.

❖ **News24 Portal** | [github](#) | [view](#)

A Single page web app created using react, react and tailwindcss with darkmode and built with vite. In future I'm planning to make fully separate backend in django and create fully function new portal.

Technology used : REACT JS, REACT ROUTER, TAILWIND CSS.
